SSSF Hash Tags:

#SSSFVI, #sssciencefestival, #sssciencefestival2020 #SSSFvirtual #SSSFVIvirtual

Raffle Process

- When participants answer a question, their names are visible on the screen for the hosts.
- When participants share or like a post on our social media platforms, they
 will also receive a raffle ticket, thus getting their name added to the
 wheel.
- Their names will be taken and added to a spinning wheel, where the names will be spun on the wheel to decide a winner.
 - There will be one wheel for each raffle, so the time at which participants answer a question will determine which raffle their name is entered into.
 - (See slide above for timings)
- Each wheel can hold 200 names, so if the amount of people on each wheel exceeds 200, we will create another wheel.
 - In this scenario, the winners from each wheel will be added to one ultimate wheel, in which the winner of this wheel wins the raffle and the prize.

Raffle Process

- The names in the wheel can be customized to fit the needs of the wheel.
- There will be at least 5
 wheels in total, with 1
 for each raffle.
